Name: LI FANGZHOU

Affiliation: Graduate School of  
Regional Innovation Studies

Year: 2nd year of Doctoral Program

Unit: Social Unit

Language proficiency: Japanese - Fluent  
English - Can manage to some extent

## What do I want to do:

In addition to various public surveys and data collected so far, I want to identify the specific uncertainties and anxieties that each international student faces during job hunting, as well as the common characteristics of those who were able to find employment and those who weren't. Based on these findings, I aim to propose and organize events to help convert the employment aspirations of Chinese international students, or international students as a whole, into actual employment rates.
